

Rd8000 Test Optical Cable

Overview

The RD8000 is a powerful cable locator that can be used to locate buried cables and pipes. Designed with operator's needs in mind, the RD8000 delivers speed, accuracy and reliability, yet remains a cost-effective solution for any application use. Despite its weight and form, the RD8000 retains the environmental durability associated with an IP54 rating, meaning you can operate it in. G! The transmitter is capable of outputting potentially lethal voltages. The transmitter can apply a signal using three different methods:.

Special Bluetooth notice ® RD8000 locators and transmitters contain a Class 1 device that can emit radio frequency energy Bluetooth ® during the operation of certain product. Thank you for your interest in Radiodetection's RD8000 cable and pipe locator. Please read this user manual before attempting to use the RD8000 system.
