

Remote Intelligent Network PDU

Overview

Securely control power on/off/reboot to a server, router, web cam, firewall or other remote devices over IP. Also known as: secure remote reboot CAT5, Web remote power, intelligent power distribution management, secure PDU, power over ip, control power on off. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU. Designed to simplify deployment and take stress out of power distribution, this intelligent PDU helps reclaim valuable hours. Whether that means speeding up Saturday installs or focusing on. Raritan intelligent PDUs (iPDUs) make remote power management fast, simple, flexible, and secure. Manage a single PDU or groups of PDUs simultaneously. If the power supply to one of the inputs fails or deteriorates, the device automatically switches consumers to the other. The Soetec K series PDU is a remote-monitoring power distributor. The software is secure and reliable, supporting TCP/IP protocol stacks like HTTP, SSL, SNMP, TELNET, SSH, SMTP.

Article Content

What is a power distribution unit (PDU)?

A power distribution unit (PDU) is a device for controlling data center electrical power. The most basic PDUs are large

Remote Power Distribution Unit Management Intelligent

Secure Remote Power Control Unit with Environmental Monitoring Securely control power on/off/reboot to
