

RoHS Fiber Optic Terminal Box 2 Cores

Summary of Content

A RoHS-compliant 2-core fiber optic terminal box is a compact, durable enclosure designed for FTTH/FTTX networks, supporting splicing, termination, and patching of two optical fibers.

Key Features and Specifications

- **Material and Certification:** Typically made from ABS or PC-ABS plastic, providing durability, chemical resistance, and UV protection. Most models are CE, RoHS, and FCC certified, ensuring environmental compliance and safety standards .
- **Capacity:** Designed for 2 optical fibers, often with 2 SC ports or compatible with LC adapters. Some boxes support up to 4-core splicing when using LC configurations .
- **Installation Options:** Can be wall-mounted, flip-mounted, or desktop-mounted, suitable for both indoor and outdoor environments. Some models feature sliding covers or flip covers for easy access and protection .
- **Cable Management:** Equipped with internal trays or turnover structures for managing fiber slack, maintaining proper bend radius, and organizing pigtails or patch cords. Multiple cable inlets allow flexible routing of drop cables .
- **Splicing and Termination:** Supports mechanical and fusion splicing, as well as field-installable connectors, making it versatile for different network setups .
- **Environmental Protection:** Many boxes are waterproof and dustproof, with protection levels up to IP55, suitable for harsh conditions .
- **Network Compatibility:** Compatible with FTTH, FTTB, FTTO, and FTTX networks, supporting broadband services like WiFi, 4G, 3G, and wired LAN .
