

SC10G optical module

Overview

This Cisco ONS-SC+-10G-LR compatible SFP+ transceiver supports 10GBase-LR and 10GBase-LW throughput up to 10km over single-mode fiber (SMF). It operates at a 1310nm wavelength and features an LC duplex connector. Following various industry standards, the transceiver complies with SFP+ MSA. Integrated circuits and reference designs help you create a smaller and faster optical module design used in high-bandwidth data communication applications. Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module. This high-quality Cisco ONS-SC+-10G-LR Compatible 10GBASE-LR SFP+ 1310nm 10km DOM Transceiver. Each transceiver is 100% optically inspected and tested for compatibility before shipping. 100%. With the increasing demand for high-speed optical communications in data centers, enterprise networks, and carrier networks, 10G BiDi SFP+ optical modules have become a mainstream short-haul optical communication solution due to their single-fiber bidirectional (BiDi) transmission characteristics. SFP+ transceiver that supports 10G connections up to 10 km using single-mode fiber with a duplex LC UPC connector. Power Consumption CLASS 1 LASER PRODUCT, IEC/EN 60825-1:2014 Do not look into the ends of the fiber optic cable or SFP module while converters are. Explore new heights of connectivity with the Miljet MJ-XGSPON10G-OLT optical transceiver. This equipment offers both symmetric Downstream and Upstream speeds of 10Gbps, as well as the option of asymmetric speeds of 10Gbps for Downstream and 2. Its robust construction, including.
