

Safe City Korean Distribution Box Low Noise

Summary of Content

Korean-made distribution boxes like BOXCO and DSE HIBOX offer durable, low-noise, and IP67-rated solutions for safe urban and industrial electrical distribution.

Key Features

Durable Construction: Both BOXCO and DSE HIBOX boxes are made from high-impact resistant materials such as ABS plastic and polycarbonate blends, providing excellent resistance to physical impacts, chemical corrosion, and harsh environmental conditions . **Waterproof and Dustproof:** These boxes are IP67-rated, ensuring protection against dust ingress and temporary submersion in water, making them suitable for outdoor installations and urban environments . **Low Noise Operation:** The design of these enclosures minimizes vibration and operational noise, which is critical for installations in residential or city areas where quiet operation is required . **Modular and Flexible Design:** Pre-drilled knockouts and internal rail mounting allow easy installation of DIN-standard terminal blocks, MCBs, and other low-voltage components. This modularity supports quick wiring, maintenance, and future expansion . **Safety and Compliance:** These boxes meet international safety standards, including shock resistance (IK08 rating) and thermal stability (-30°C to +90°C), ensuring reliable protection for electrical circuits and personnel . **Customization Options:** OEM/ODM services allow customization of housing color, labeling, pre-wired terminals, and other specifications to match project requirements .

Applications
