

Self-supporting SC optical cable

Overview

There is no support or messenger wire required, allowing installation to be achieved in a single pass, dramatically reducing installation time and cost while delivering high-speed internet to rural areas. The cables are RDUP (RUS) listed and offer exceptional crush resistance. The self-bonding invisible cable is applicable to indoor corridors and rooms. The self-bonding invisible cable is attached with adhesive, and can be easily pre-routed on a suitable wall surface after the release film. The 1-2 Core Aerial Self-Support FTTH Drop Cable (GJYXFCH) is a high-quality FTTH (Fiber to the Home) solution designed for reliable and efficient aerial fiber optic installations. The gel-free design is. SC/APC FTTH Drop Cable Patch Cord Self-supporting Aerial It's a kind of patch cable but assembly with Self-supporting Aerial FTTH Drop Cable. Used widely between Fact plate, terminal box, ONU tec. low dispersion and attenuation.
