

Setting up a wireless router with TP-Link and fiber optic connections

Summary of Content

You can set up a TP-Link router with fiber optic internet by connecting it to your ISP-provided ONT and configuring the router via its web interface or TP-Link Tether app.

Step 1: Gather Equipment

Ensure you have the following:

- Optical Network Terminal (ONT) provided by your ISP, which converts the fiber signal to Ethernet .
- TP-Link router with a Gigabit WAN port (Wi-Fi 6 or newer recommended for high-speed fiber), .
- Fiber optic cable (SC/APC or SC/UPC connectors) and Ethernet cable.
- A computer or mobile device for configuration.

Step 2: Connect the Hardware

- Connect the fiber optic cable from the wall outlet to the ONT and power it on. Wait for the status lights to stabilize (2-5 minutes), .
- Link the ONT to your TP-Link router using an Ethernet cable from the ONT's LAN port to the router's WAN port .
- Power on the router and wait for the indicator lights to confirm connectivity .

Step 3: Access the Router Interface
