

Single-mode 144-core fiber

Overview

144 fiber breakout cables are commonly used in the consolidation of 72 duplex fiber cables, and reduce unnecessary bulk and cost associated with numerous individual fiber cables. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swappable materials, which means cable access is simple and no clean. Corning SST-Ribbon cables represent a truly innovative breakthrough in outside plant cable technology. Providing up to 216 fibers in a compact design, the enhanced coupling features ensure the ribbon stack and cable act as one unit, providing long-term reliability in aerial, duct and direct-buried. 144 Core Fiber Optic Cable GYTY53 Outdoor Armored Double Jacket Waterproof Gel Filled loose tube direct burial is used for direct buried underground, it suit for long distance and LAN fiber communications, we supply both the single mode GYTY53 cable and multimode GYTY53 cables. What is the. 288 singlemode fibres for high density data center distribution applications. ach ribbon shall have its own sub-unit tube for easy handling and management. The intermittent nature of the bond allows the fibers to be bunched together when. In addition, Anixter. com offers Less-Than-A-Truckload “LTL” option for products that cannot be shipped via parcel shipping.
