

Single-row 26-circuit distribution box

Summary of Content

A 26-circuit single-row distribution box is designed to manage 26 individual circuits in a compact, organized, and safe enclosure for residential, commercial, or industrial electrical systems.

Overview

A 26-circuit single-row distribution box features 26 slots for circuit breakers, allowing centralized control and protection of multiple electrical circuits from a single unit . Single-row boxes are typically used in residential complexes, small commercial spaces, and lighting-focused installations, operating on standard 230V single-phase supply for low to moderate power demands .

Construction and Materials

- Enclosure: Made from metal or high-grade plastic (PC + ABS), providing durability, insulation, and impact resistance .
- Protection Level: Many models offer IP65 rating, ensuring dust and water resistance, suitable for indoor and outdoor installations .
- Flame Retardancy: Covers and panels often meet UL94 V-0 standards, preventing fire hazards .
- Base and Rails: The base is usually cold-rolled steel (0.8–1.0mm thick) with galvanized or zinc-plated DIN rails for mounting breakers and preventing rust .
- Busbars and Terminals: Copper busbars with PC material brackets ensure safe and reliable electrical connections .
