

South Sudan s tallest communications tower

Summary of Content

The Equatoria Tower in Juba is currently the tallest known structure in South Sudan with communications capabilities.

Overview

The Equatoria Tower is a commercial high-rise under construction in Juba, South Sudan, developed by UAP Properties Limited in partnership with the Central Equatoria Investment Company (CEIC) and supported by the International Finance Corporation (IFC) of the World Bank Group . While primarily a commercial office building, it is equipped with ready-to-use Information Communication Technology (ICT) installations, making it the tallest structure in the country with telecommunications functionality .

Structure and Features

- Floors: 14 above ground, with modern office facilities
- Amenities: Air conditioning, three high-speed elevators, reliable water and power supply, and sewage disposal
- Purpose: Designed to support business infrastructure and ICT services in South Sudan, providing a platform for commercial growth and connectivity
- Economic Impact: Expected to create around 100 direct and indirect jobs and enhance the business environment in Juba
