

Specifications and Models of Cold-Dip Galvanized Cable Trays in India

Summary of Content

Cold-dip galvanized cable trays in India are available in various types, sizes, and thicknesses, designed for high load capacity, corrosion resistance, and industrial applications.

Types of Cable Trays

Cold-dip galvanized cable trays are commonly available in the following types:

- Ladder-type trays: Ideal for heavy-duty cables and long spans, providing excellent ventilation and support.
- Perforated trays: Suitable for medium loads, allowing heat dissipation and easy cable management.
- Solid-bottom trays: Used where protection from dust, moisture, or debris is required.
- Floor trunking trays: Designed for building interiors and commercial installations .

Material and Finish

- Material: Mild steel (MS) or pre-galvanized steel.
- Finish: Cold-dip galvanization ensures corrosion resistance and long service life, suitable for industrial, commercial, and outdoor applications .
