

# Specifications and dimensions of dedicated temporary power distribution boxes

## Summary of Content

Temporary power distribution boxes are portable units designed for safe, flexible power distribution on jobsites, events, and industrial applications, with ratings from 20A to 800A, multiple outlet types, and rugged, weather-resistant enclosures.

### Electrical Specifications

Temporary power distribution boxes are available in a wide range of amperage ratings, typically from 20A up to 800A, and support 120/240V AC systems for both single-phase and three-phase applications (Lex Products, Power Tech®) . Common outlet configurations include:

- 15/20A duplex outlets for general-purpose loads
- 30A and 50A Twist-Lock® outlets for higher-power equipment
- GFCI-protected outlets for safety against electrical shock, with self-testing and LED indicators (Power Tech®)
- Adjustable circuit breakers in some models (Load Master™ Series) to match specific load requirements Boxes may feature straight blade or Twist-Lock® connectors, depending on the application, and often include overload protection and open-neutral/reverse-phasing protection for enhanced safety .
