

Specifications of power distribution boxes for computer rooms

Summary of Content

Power distribution boxes for computer rooms, including PDUs and cabinets, provide reliable, scalable, and monitored power delivery to IT equipment, with capacities ranging from 15 kVA to 400 A and options for intelligent monitoring and switching.

Key Features and Specifications

1. Capacity and Input

- Power distribution cabinets like the Liebert FPC range from 15 kVA to 300 kVA, supporting both 50Hz and 60Hz systems .
- Remote power distribution cabinets such as the Liebert RXV can handle up to 400 Amp inputs with 84 poles in a compact 24"x12" panelboard .
- PDUs can be single-phase for low-density racks or three-phase for high-density racks, providing efficient load balancing .

2. Form Factor and Installation

- Rack-mounted PDUs fit standard server racks and network cabinets, often in 1U to 3U sizes, while larger distribution cabinets can be standalone or row-mounted .
- Compact cabinets like the Vertiv Liebert RX are configurable in 1-4 unit space-saving blocks, suitable for small to mid-sized data centers .

• Installation may include tool-less mounting, color-coded outlets, and universal input options for flexibility .

3. Monitoring and Control

- Basic PDUs provide reliable power distribution without monitoring.
