

Standard Price of Level 2 and 3 Distribution Boxes

Summary of Content

The cost of Level 2 to Level 3 distribution boxes typically ranges from \$150 to over \$1,000 depending on capacity, features, and application.

Pricing Overview

Distribution boxes vary widely in price based on voltage rating, amperage capacity, number of circuits, material, and integrated safety features. Standard residential or light commercial Level 2 boxes generally start around \$150-\$300, while more advanced Level 3 boxes for industrial or high-capacity applications can exceed \$1,000 due to enhanced durability, larger capacity, and smart monitoring capabilities. Outdoor-rated or weather-resistant enclosures usually carry a premium compared to indoor units.

Factors Affecting Cost

- **Material and Construction:** Corrosion-resistant metals or high-grade plastics increase durability and cost.
- **Capacity:** Higher amperage and more circuits raise the price. Level 3 boxes often support three-phase systems and multiple circuits.
- **Safety Features:** Integrated surge protection, ground fault circuit interrupters, and arc fault detection add to the cost.
- **Smart Features:** Digital displays, remote monitoring, and load management systems can significantly increase upfront costs but improve long-term efficiency.
