

Standard Price of Outdoor Customized Distribution Boxes

Summary of Content

The price of customized outdoor distribution boxes typically ranges from \$50 to \$500 or more per unit, depending on size, material, and features.

Factors Affecting Price

- **Material:** Outdoor distribution boxes are commonly made from stainless steel, cold-rolled steel, or durable plastics. Stainless steel and high-grade metals generally cost more due to corrosion resistance and durability .
- **Size and Capacity:** Larger boxes that accommodate more circuits or equipment are more expensive. Standard residential boxes are cheaper, while commercial or industrial-sized enclosures can significantly increase the cost .
- **Waterproofing and Weatherproofing:** Boxes with IP65-IP68 ratings or reinforced rainproof designs command higher prices because they protect electrical components from moisture, dust, and harsh outdoor conditions .
- **Customization:** Custom features such as specific dimensions, internal compartments, secure closures, handles, or branding can increase the price. Fully tailored enclosures require additional engineering and fabrication .
- **Certifications and Standards:** Products with CE, 3C, or UL certifications may cost more due to compliance with international safety and quality standards .
- **Quantity and Supplier:** Bulk orders often reduce the per-unit cost, while single or small orders may be priced higher. Prices also vary by supplier location and shipping costs .
