

Standard configuration of a complete set of household electrical distribution boxes

Summary of Content

A complete household electrical distribution box typically includes a main switch, individual circuit breakers for lighting, sockets, and high-power appliances, along with protective devices like RCCBs, surge protectors, bus bars, and proper grounding.

Core Components

Main Switch: Controls the entire electrical system, allowing the household to be disconnected from the main supply for maintenance or emergencies .

Circuit Breakers: Protect individual circuits from overloads and short circuits. Common types include:

- 1P (Single Pole): Controls the live wire for basic circuits.
- 1P+N (Single Pole + Neutral): Protects both live and neutral wires.
