

Steps for making a fiber optic junction box

Summary of Content

Installing a fiber optic junction box involves careful preparation, precise mounting, proper cable handling, splicing, and testing to ensure reliable connectivity.

1. Preparation and Tools

Before starting, gather all necessary tools and materials:

- Fiber optic junction box (wall-mounted, rack-mounted, or outdoor-rated depending on location)
- Screws, dowels, and a drill
- Fiber optic cable stripper and cleaver
- Splice trays and adapters
- Fiber optic connectors and pigtails
- Testing equipment (OTDR or power meter)
- Labels and cable management accessories Choose a location close to the fiber transfer point, avoiding direct sunlight, moisture, or areas difficult to access for maintenance .

2. Mounting the Junction Box

- Mark drill holes using a spirit level to ensure the box is straight .
- Drill holes and insert dowels.
