

Switch Access Settings

Summary of Content

Switch Access allows you to control your Android device using external switches, keyboard keys, or camera gestures, and you can customize actions, scanning methods, and menu options to suit your needs.

Setting Up Switch Access

- Open Settings: Go to your device's Settings app.
- Navigate to Accessibility: Tap Accessibility > Switch Access.
- Enable Switch Access: Toggle it on and grant any required permissions, such as camera access for facial gestures if using Camera Switches .
- Choose Switch Type: You can use:
 - External switches via USB or Bluetooth
 - External keyboard keys as switches
 - Built-in device buttons (like volume keys)
 - Camera gestures for facial expressions

Assigning Switch Actions

- In Switch Access Settings, select Assign switches for scanning.
- Choose the action you want to assign (e.g., Select, Next, Previous, Scroll forward/backward, Touch & hold).
- Press the switch or key to assign it. You can assign multiple switches to the same action, which is useful if using a full keyboard as a single switch .
