

Taiwan Fireproof Cable Tray Price Inquiry

Summary of Content

Fireproof cable trays in Taiwan typically range from \$20 to \$150 per meter depending on material, type, and fire rating.

Overview of Fireproof Cable Trays in Taiwan

Taiwanese manufacturers offer a variety of fireproof cable trays, including perforated trays, ladder-type trays, wire mesh trays, and trough trays. These trays are designed to protect electrical cables from fire, moisture, corrosion, and mechanical damage, ensuring safety and compliance with industry standards. Common materials include galvanized steel, stainless steel, aluminum, and fiberglass, with stainless steel providing superior fire and corrosion resistance.

Factors Affecting Price

- **Material:** Stainless steel and aluminum trays are more expensive than galvanized steel or PVC due to higher durability and fire resistance.
- **Tray Type:** Ladder-type and perforated trays are generally mid-range, while specialized trays for high-risk areas (e.g., nuclear plants or server rooms) cost more.
- **Fireproof Coating:** Trays with intumescent coatings or mineral-insulated wraps command higher prices because they enhance fire resistance.
- **Size and Load Capacity:** Wider trays or those designed for heavy-duty applications increase cost per meter.
- **Customization:** Custom dimensions, finishes (SS304, HDG, EG), or specialized designs for industrial projects can significantly affect pricing.
