

There is an electrical distribution box around the house

Summary of Content

An electrical distribution box, also known as a breaker box or fuse box, is typically located in the basement, garage, utility room, or mounted outside near the electrical meter.

Purpose of the Distribution Box

The distribution box serves as the central hub for your home's electrical system. It distributes electricity from the main supply to individual circuits throughout the house, protecting wiring and devices from overloads or short circuits through fuses or circuit breakers. Modern boxes may also include residual current devices (RCDs), surge protection, and smart home modules for enhanced safety and efficiency .

Common Locations

- Basement or utility room: Often tucked away but easily accessible for maintenance .
- Garage: Frequently used in homes without basements.
- Outside near the meter: Some homes have weatherproof boxes mounted externally for easy access by utility personnel .
- Shared spaces in condos or townhouses: May be located in hallways or communal areas .
