

Three-pack pigtail fiber

Summary of Content

A three-pack fiber optic pigtail is a set of three pre-terminated fiber cables used for splicing or connecting fiber optic networks, available in single-mode or multimode with various connector types.

Overview

Fiber optic pigtails are short lengths of fiber cable with a connector on one end and an exposed fiber on the other, designed for splicing into a fiber optic network or connecting to patch panels and network devices . A three-pack simply means the product includes three individual pigtails, which is convenient for installations requiring multiple connections or spares .

Types and Specifications

- Fiber Types: Single-mode (9/125 μm), multimode (62.5/125 μm), and high-speed OM3/OM4/OM5 fibers .
- Connector Types: LC, SC, ST, and FC connectors are commonly available .
- Cable Diameter: Typically 0.9 mm outer diameter for standard pigtails .
- Configuration: Available in simplex (single fiber) or duplex (paired fibers) depending on network requirements .
- Length Options: Standard lengths are usually 1–2 meters, but custom lengths can be ordered .

Applications

- Splicing: Used for mechanical or fusion splicing to connect fibers in a network .
