

Top of the mesh cable tray enters the cabinet

Overview

An FASP support can be bolted directly to the cabinet. If the wire mesh cable tray is to be raised a specific height above the cabinet, then we recommend a UFS support bracket or an FASP elevated with threaded rods. The cable tray system shall accommodate the weight of the horizontal and/or backbone cabling. 3 Provide horizontal elbows, end plates, vertical risers and drops, tees, wyes, expansion joints and reducers where required. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. At temperatures below - 20 °C, the material will be any other purpose than. Wired cable channels are used for cable routing in PREMIUM and iSEVEN series rack cabinets. Two types available - 30 mm and 60 mm of depth.
