

Turkmenistan right-angle bridge

Overview

The cost of the bridge was \$123 million. It was developed by the Ukrainian Institute Dneprogiprotrans. The general contractor of the corporation were the bridge builders Ukrtransstroï, who together with the Turkmen builders division of the Ministry of Railway, built this structure. According to specialists the bridge is able to withstand tremors of 8 on the Richter scale. September 16, 2009, President of Turkmenistan and v.

Summary of Content

The Kerki-Kerkichi Bridge is a major railway and highway bridge over the Amu Darya River in eastern Turkmenistan, connecting Atamurat (Kerki) and Kerkichi.

Overview

The Kerki-Kerkichi Bridge spans 1,414 meters across the Amu Darya River in Lebap Province and serves both railway and highway traffic, making it a critical transport link in Turkmenistan's eastern region . Construction began under President Saparumurat Niyazov and was completed during President Gurbanguly Berdimuhamedov's tenure, with the first passenger train crossing in 2011 . The project cost approximately \$123 million and was built by the Ukrainian Ukrtransstroy Bridge Building Corporation in collaboration with Turkmen builders .
