

UAE power distribution box dimensions and accessories

Summary of Content

UAE power distribution boxes are modular, customizable, and available in wall-mounted or floor-standing designs, supporting a wide range of accessories for safe and efficient electrical distribution.

Types and Applications

In the UAE, distribution boxes (DBs) are categorized based on voltage and application:

- Main Distribution Boards (MDBs): Floor-standing panels for large commercial or industrial facilities, data centers, and high-rise buildings. They handle high current loads and accommodate large-frame circuit breakers and busbars .
- Sub-Main Distribution Boards (SMDBs): Intermediate distribution for floors or zones in commercial towers, often wall-mounted for space efficiency .
- Final Distribution Boards (FDBs): Protect individual circuits in apartments, villas, or offices, typically wall-mounted and compact .
- Low-Tension (LT) Distribution Boxes: Designed for low-voltage applications, ensuring overload and short-circuit protection in industrial and commercial setups .
- Portable PE Power Distribution Boxes: Lightweight and portable, suitable for construction sites and temporary industrial setups .

Materials and Construction

Distribution boxes in the UAE are made from:
