

US Export Price of 50kW Rack-Mounted Lithium Battery Cabinet

Summary of Content

The estimated US export price for a 50kW rack-mounted lithium battery cabinet ranges from \$30,000 to \$60,000, depending on battery chemistry, capacity, and additional features.

Price Overview

For a 50kW lithium-ion battery storage system, the cost is primarily influenced by the battery type, energy capacity, and brand. Systems using LiFePO₄ (lithium iron phosphate) technology are generally more cost-effective and thermally stable, with prices typically ranging from \$30,000 to \$60,000 for a complete 50kW setup, including the rack-mounted cabinet and batteries. Lead-acid alternatives are cheaper, around \$15,000 to \$30,000, but have lower cycle life and require more maintenance.

Product Examples

- **RUixU 50kWh Lithium Battery Kit:** Includes 10 rack-mounted 48V batteries in a 10-slot cabinet, with options for standard or self-heating models for cold climates. This system is scalable from 5kWh to 160kWh and is suitable for residential, commercial, and off-grid applications.
- **Anern 50kW 114kWh ESS Cabinet:** Offers a compact, high-performance solution with LFP battery technology, modular design, and industrial-grade safety features. It is designed for commercial and industrial energy storage, microgrids, and renewable energy integration.
