

Ukraine Mobile Optical Modules Price Reduction

Overview

Ukraine's Ministry of Defence is introducing a mechanism to adjust the value of contracts for fibre-optic drones in response to changes in the cost of key components. According to them, the shortage is already seriously affecting drone production. Some companies have stopped accepting new orders, while others have been forced to halt. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. This figure reflects the total revenues of producers and importers (excluding logistics costs, retail marketing costs, and retailers' margins, which will be included in the final consumer. Unmanned Systems Forces are testing domestic fiber optic modules called Silkworm, which are designed for installation on air, ground, and sea drones. The USF press service published the video of the equipment. There are two versions of the coils for kamikaze drones: one with an integrated warhead. The Ukraine Telecom MNO Market Report is Segmented by Service Type (Voice Services, Data and Internet Services, Messaging Services, IoT and M2M Services, OTT and PayTV Services, and Other Services), and End User (Enterprises, Consumer).
