

Unit Price of Mexican Mesh Cable Tray

Summary of Content

A meter of wire mesh (basket) cable tray typically costs between \$2 and \$25 USD, depending on material, size, and finish.

Price Range and Material Considerations

Wire mesh cable trays, also known as basket trays, are among the most affordable cable tray types due to their lightweight design and ease of installation. The cost per meter varies based on:

- **Material:** Pre-galvanized steel is cheapest, suitable for dry indoor areas; hot-dip galvanized steel is more durable for outdoor or industrial use; aluminum is lightweight and corrosion-resistant but pricier; stainless steel is the most expensive, ideal for harsh or hygienic environments.
- **Tray Type:** Wire mesh trays are generally cheaper than ladder or solid-bottom trays and are ideal for lightweight cabling such as data or control cables.
- **Surface Finish:** Pre-galvanized is cheaper, while HDG or powder-coated finishes increase durability and cost.

Installation and Project Costs

The total installed cost may be lower than other tray types because wire mesh trays require less labor, fewer fittings, and easier modifications. Large projects or bulk orders can further reduce the per-meter cost. Labor, supports, connectors, and shipping also influence the final price.

Practical Estimate

- **Low-end:** \$2–\$5 USD per meter for pre-galvanized steel in small indoor projects.
