

Upgraded DAC high-speed cable original and genuine product

Overview

Ultra thin, high quality passive DAC network cables with data rates of up to 100Gbps. We offer variable cable length and customization if needed. The Amphenol SFP-DD products offer an ultra-high-performance, cost-effective solution for 100G aggregate speed applications in switches, routers, data storage arrays, and high-performance computer (HPC) clusters. DAC cables are a type of factory terminated twinax cable that connects directly into transceivers. Unlike discrete transceivers plus patch cords, DACs consume near-zero power and generate almost no heat, making them ideal for short-range (1-5 m) in-rack links. The cable assemblies include straight-through and breakout Direct Attach Cables (DAC), Active Copper Cables (ACC and AEC) and Active Optical Cables (AOC) in speeds ranging from 800G to 10G, in OSFP-Finned Top.
