

Vehicle-mounted fiber optic French rack-mounted PDU remote monitoring type

Summary of Content

French Type E rack-mounted PDUs with remote monitoring provide intelligent power distribution, real-time outlet-level monitoring, and remote control for IT and industrial equipment.

Overview of French Type E PDUs

French Type E PDUs are designed for regions using the Type E plug standard, featuring two round pins and a dedicated grounding hole, operating at 230V, 50Hz, and typically rated up to 16A/4000W . These PDUs are suitable for rack-mounted installations in data centers, server rooms, industrial cabinets, or vehicle-mounted setups where French electrical standards are required .

Types of PDUs with Remote Monitoring

-

Monitored PDU: Measures power parameters such as current, voltage, power, and energy consumption at the PDU or outlet level. Data can be accessed remotely via network interfaces or management software, with alerts for abnormal conditions .

-

Switched PDU: Extends monitored PDU functionality by allowing remote control of individual outlets, enabling remote restart, timed switching, and power management for connected devices .
