

Waterproof Protective Distribution Box

Summary of Content

A waterproof protective distribution box is an IP65–IP68 rated enclosure designed to safeguard electrical components from water, dust, and UV exposure, suitable for outdoor and industrial applications.

Key Features

Ingress Protection (IP Rating): Most waterproof distribution boxes are rated IP65 to IP68, ensuring protection against dust, rain, and splashes, with some models capable of temporary submersion in water (IP68) for harsh environments . **Materials:** Commonly made from ABS or polycarbonate plastics, these enclosures offer durability, UV resistance, and mechanical strength while remaining lightweight for easy installation . **Design and Mounting:** Many boxes support DIN rail mounting, allowing flexible wiring and modular installation of circuit breakers, terminals, and miniature modules. Options include single, double, or triple layers and various sizes to accommodate 2–39 ways of electrical connections . **Transparency and Inspection:** Some models feature transparent covers, enabling visual inspection of switches and breakers without opening the box, enhancing safety and convenience .

Environmental Suitability: Designed for outdoor, industrial, and photovoltaic applications, these boxes protect against snow, rain, dust, and UV exposure, making them ideal for homes, workshops, hotels, shopping malls, power stations, and solar systems . **Standards Compliance:** Most waterproof distribution boxes comply with IEC 60529 and other international standards, ensuring reliable electrical protection and flammability safety per UL 94 .

Applications
