

# Waterproof with electrical box

## Summary of Content

Waterproof electrical boxes are outdoor-rated enclosures—typically IP65, IP66, or IP67—that protect wiring and components from water, dust, and weather exposure, with common materials including ABS, polycarbonate, ASA plastic, and stainless steel.

### What Makes an Electrical Box Waterproof

- Waterproof performance is defined by the IP (Ingress Protection) rating.
- IP65–IP67 boxes are dust-tight and resist water jets or temporary immersion, making them suitable for outdoor use.
- Proper sealing requires a compression gasket and waterproof cable glands.

### Common Materials

- ABS / Polycarbonate (PC): Lightweight, corrosion-resistant, good for general outdoor use.
- ASA Plastic: UV-resistant, used in many IP67 enclosures.
- Stainless Steel: High durability for industrial or harsh environments.

### Typical Options Available

Examples from NZ suppliers include:

- Takachi IP67 plastic enclosures (ABS/ASA) in various sizes.
- IP54–IP65 outdoor junction boxes for wiring connections.
