

Weight of Huawei Standard Network Cabinet

Summary of Content

A typical Huawei standard network cabinet weighs approximately 80–120 kg when empty, depending on the model and size.

Empty Cabinet Weight

Huawei standard network cabinets, such as the N63E-22 and N66E, are constructed from welded electro-galvanized steel and cold-rolled steel sheets, with front and rear doors and side panels. The empty weight of these cabinets generally ranges from 80 kg to 120 kg, depending on height and configuration . For example, a 2200 mm high N63E-22 cabinet with standard panels and doors falls within this weight range .

Dimensions and Capacity

- Height: 2000–2200 mm (42–47 U)
- Width: 600 mm
