

What are the accessories for equipment power distribution boxes

Summary of Content

Power distribution boxes include a variety of accessories such as protective devices, mounting hardware, cable management components, monitoring modules, and security features to ensure safe and efficient power distribution.

Core Protective Accessories

- **Circuit Breakers (MCBs):** Automatically cut off power during overloads or short circuits to protect equipment and users .
- **Residual Current Devices (RCDs):** Detect leakage currents and prevent electric shocks .
- **Surge Protective Devices (SPDs):** Protect against transient overvoltages caused by lightning or switching events .
- **Fuses and Protective Relays:** Provide additional fault detection and isolation for sensitive circuits .

Mounting and Structural Accessories

- **DIN Rails:** Standardized rails for mounting circuit breakers, relays, and other modular devices .
- **Busbars:** Conductive bars for distributing power efficiently across multiple circuits .
- **Hinges, Latches, and Locks:** Ensure secure enclosure access and prevent unauthorized tampering .
