

What grade does armored pigtail belong to

Overview

Widely used within GPON applications and data centre, the pigtails can be manufactured in OS2 grade singlemode G. Improving on Precision Group's wildly popular Indoor/Outdoor Pigtail offerings, the Superior Flex A2 Armored Pigtail offers more durability and flexibility. Made with the same Bend insensitive glass as our Superior Flex A2 series, these pigtails take protection a notch further with an inner steel. That is a fiber optic pigtail, and it is one of the most misunderstood parts of an optical network. Order the wrong buffer diameter or fiber grade and your splice tray turns into a mess. Tails can be. Armored fiber patch cables feature a specialized jacketing that increases the durability of fiber cables. This article is a selection guide for Fiber patch cords and pigtails, which systematically introduces the definitions and differences between the two, different application environments and construction types, specifications and parameters of single core and multi-core Fiber Optic connectors.

Article Content

How to choose fiber optic pigtails?

Applications Fiber optic pigtails are used to terminated fiber optic cables via fusion splicing or mechanical splicing as shown in the

LC Armored 3.0mm Pigtail
