

What is Sungrow Power s new product that integrates three electrical components

Overview

Sungrow's new PowerHarbor residential all-in-one hybrid inverter system offers 10–30 kW inverter power, 6–10 kWh modular LFP battery blocks, 1.6× PV-to-battery fast charging, AI-driven energy optimization, and up to 150% phase unbalance output. April 27th —Hefei, China—Sungrow, the globally leading PV inverter and energy storage system (ESS) provider, unveiled its next-generation PowerMatrix system for renewable energy applications, alongside a newly released technical white paper, at the Global Renewable Energy Summit (GRES) 2026. It features an integrated AC block, grid-forming and blackstart capabilities and will be deployed in European projects from next year on. The system offers flexible 10–30 kW power ratings and 6–10 kWh battery module options. Beyond a conventional all-in-one system, PowerHarbor sets a new benchmark in residential energy with three industry-first innovations that redefine flexibility, intelligence, and reliability for modern homes. Under the theme “Value-Driven, Scenario-Proven,” the summit showcased Sungrow's.
