

What is the price of long-span cable trays

Summary of Content

Long-span cable trays typically range from \$50 to \$300 per meter, depending on material, size, and load capacity.

Pricing Overview

The cost of long-span cable trays varies widely based on material type, span length, load-bearing capacity, and customization. Common materials include galvanized steel, stainless steel (304/316), aluminum, and FRP, with stainless steel and FRP generally commanding higher prices due to corrosion resistance and durability. Standard ladder-style trays are usually more affordable than fully perforated or wire mesh designs with specialized coatings.

Factors Affecting Price

- **Material:** Aluminum and stainless steel trays are more expensive than hot-dip galvanized steel.
- **Span Length:** Longer spans reduce the number of supports needed but may increase the per-meter cost due to structural reinforcement requirements.
- **Load Capacity:** Trays designed for heavy-duty industrial cables or multiple branch lines cost more.
- **Customization:** Custom shapes, sizes, or coatings (e.g., powder-coated, LSZH compliant) increase cost.
- **Supplier and MOQ:** Prices can vary depending on supplier, order quantity, and shipping. Some manufacturers offer bulk discounts or allow small pilot orders of 1-10 meters.
