

Where are the most optical cable factories in China

Summary of Content

China has dozens of optical cable factories, with major manufacturers operating multiple plants and over 100 companies involved in fiber optic cable production.

China's optical cable industry is extensive and highly developed. Leading companies like YOFC (Yangtze Optical Fibre and Cable) operate 13 state-of-the-art factories across the country, producing optical preforms, fibers, and cables with advanced automation and high-quality standards. Other top manufacturers, such as Hengtong Optic-Electric, also maintain multiple production facilities covering the full manufacturing chain. In total, there are around 20 major vendors producing both optical fiber and cable, with over 10 enterprises capable of producing the entire chain from preform to finished cable. Beyond these, a broader ecosystem includes over 100 companies engaged in fiber optic cable manufacturing, including specialized producers of indoor, outdoor, armored, and FTTH drop cables. These factories are distributed across key industrial regions in China, including Hubei, Jiangsu, Guangdong, and Shenzhen, supporting both domestic network expansion and global exports. The industry benefits from vertical integration, advanced automation, and large-scale production, enabling China to supply billions of core-kilometers of fiber annually and maintain a leading position in the global market. Overall, while an exact factory count is difficult to pinpoint due to the mix of large-scale manufacturers and smaller specialized producers, it is clear that China hosts dozens of optical cable factories, forming a robust and globally competitive manufacturing ecosystem.
