

Where can I find cable trays in Saudi Arabia

Summary of Content

Saudi Arabia offers a wide range of high-quality cable tray systems suitable for industrial, commercial, and infrastructure projects, with multiple local manufacturers providing durable, corrosion-resistant, and standards-compliant solutions.

Overview of Cable Trays

Cable trays are structural systems designed to support, route, and protect electrical and communication cables in buildings, factories, data centers, and industrial plants. They provide a secure and organized pathway for cables, allowing easier installation, maintenance, and future expansion compared to traditional conduit systems. Cable trays can be made from hot-dipped galvanized steel, powder-coated steel, aluminum, or corrosion-resistant materials, ensuring long-term performance in harsh environments such as desert sites, coastal areas, and industrial zones.

Types of Cable Trays

Common types of cable trays available in Saudi Arabia include:

- Ladder-type trays: Ideal for heavy power and control cables, providing excellent ventilation and support.
- Perforated trays: Suitable for medium-weight cables, allowing airflow and heat dissipation.
- Wire mesh trays: Flexible and lightweight, often used in data centers and commercial buildings.
