

Wholesale Price OTN Router SFP

Summary of Content

OTN routers and SFP modules are available at competitive wholesale prices from global suppliers, with options ranging from basic 1 Gbps SFPs to high-capacity 200 Gbps OTN equipment.

OTN Routers Overview

OTN (Optical Transport Network) routers are designed for high-speed, long-distance data transmission, supporting protocols like Gigabit Ethernet (GigE) and 100 Gigabit Ethernet (100GigE) for telecom, data centers, and enterprise networks. Key components include OTN switches, muxponders, demultiplexers, and transponders, which ensure efficient signal transport, multiplexing, and protocol conversion while maintaining low latency and high signal integrity. Wholesale OTN routers can be sourced from platforms like Alibaba, offering CE-certified and OEM-compatible solutions suitable for FTTH and DCI networks .

SFP Modules

SFP (Small Form-factor Pluggable) modules are compact transceivers that connect to routers or switches to enable high-speed fiber optic or copper data transmission. They typically support speeds from 1 Gbps to 100 Gbps, with flexible connectivity for both short-range copper and long-range fiber optic links. SFP modules enhance network bandwidth, reliability, and performance, and are widely available from wholesale suppliers on platforms like AliExpress and Global Sources . Popular options include 10/100/1000BASE RJ45, 25G SFP28, and 1310nm 10km modules.
