

Wiring of the operator s distribution box

Overview

This guide provides the full installation workflow for both the Client Module (Riser Cable Installation) and the Operator Module (Feeder Cable Installation), along with detailed instructions for PLC Splitter installation and patch cord routing between modules. A distribution box is the heart of any electrical system. It takes the incoming power and safely distributes it to different circuits throughout your building. Whether it is residential buildings, commercial facilities or industrial sites, the. Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. Binding Requirements: The wires should be bound with plastic ties.
