

# Xinye Communication Optical Cable Dedicated Trenching Machine

## Overview

High-Speed Operation: Speed reaches 100-200m/h for efficient trenching in various soil types. Robust Power Source: Powered by diesel engine for reliable performance in field conditions. DEXU trenching machine is mainly used for dig ditch in engineering construction and agriculture, has the functions of digging and backfill, flexible and easy operating, especially apply to the condition of environment space narrow difficult to carry out traditional operating. Best for: Urban sidewalks, residential areas, industrial sites, and mixed terrain with obstacles Expert Tip: Always perform a utility locate (call 811 or. A trencher machine for laying fiber cable is an essential piece of equipment used in telecommunications, utility installation, and infrastructure development.
